

755-Series Multi-Display Timers Product # 755

The 755 Series Multi-Display Timer is an economical, multifunction timer in sixteen channels. An easy-to-use timer counts down or up in minutes and seconds, or hours and minutes. Each channel has its own display, and can be programmed independently. Slide in replaceable menu strips identify the product being timed on each channel, and replace as restaurant menu changes.

Prince Castle Timers are easy to program and simple to use. The push of a button activates each channel; an audible alarm and flashing channel button alert the operator when timing is complete. Operators also have the option to program a preliminary alarm to warn the end of the timing cycle is near.

Prince Castle timers are backed by a one-year parts and labor warranty.

Product Features

- Each channel counts down or up in minutes and seconds, or hours and minutes.
- Each channel has its own display - capable of displaying both alpha and numeric characters.
- Toggles between countdown (or count-up) time and duty function.
