- **Body on rigid structural frame**
- **Wide base to protect cabinet body**
- **Self-closing doors with magnetic gaskets**  
Provide maximum heat retention and sealing
- **Removable tray racks**

### Options & Accessories

- **Aluminium perforated bun pan**

### Specifications

The Fabristeel Holding Cabinet is a highly efficient, fully insulated cabinet that is designed to keep food safe, hot and fresh at the desired temperature until it is ready to be served.

Two powerful, highly efficient fans and a high capacity heating element, combining with its specially designed interior, it aids in recirculating the hot humidified air throughout all levels of the cabinet. Its specially designed quick recovery system aids in maintaining the temperature on the inside even through the consistent opening and closing of doors.

Food can also be prepared ahead of time, which reduces the labour work required during peak periods.

With Fabristeel Holding Cabinet, food safety is never compromised.
